Biography:

m o i + m o n o (pronounced moi et mono) is the alias of Alphonso Steverink (Arnhem, NL). His music, influenced by Ambient (electronica) and Post-Rock, is spontaneous, intuitive and arises in the moment. With a modular synthesizer at its heart, he creates a unique mix of subdued and exhilarating sounds which he would describe as 'melancholic modular'. When the opportunity arises, the artist complements the performance with interactive visuals to create a total experience.

Alphonso teaches media design at the University of Applied Sciences in Arnhem and graduated as a media artist at the Frank Mohr Institute in Groningen.
